Ext JS 3-5 Day Training

Our Ext JS 4.0 training is designed to give you essential knowledge on using this new framework focusing on real-world experience in the field. With this course, you'll learn to master critical Ext JS 4.0 essentials, such as the new class system, and you'll get to exercise the newly updated grid and tree Panels.

Module1 : Ext JS 4.0 fundamentals
This module revolves around the fundamental Ext JS features, such as how to properly bootstrap your code, and management of DOM elements and their events. Included in this day are a deep dive into the various JavaScript utilities, as well as a look into how the various template mechanisms work.

Module 2 : Ext JS 4.0 Components
Focuses on Ext JS components, beginning with an overview of Components, which provides a foundation for learning and implementing the rest of the framework. Important subject matter includes Containers, Layouts, Data Stores, and their supporting classes.

Module 3 : Ext JS 4.0 Data Components
This module focuses on various views to render data on screen implementing what the students learned in module 2. Students will learn to enhance application experience with the rich Ext JS data views, including DataView, TableView, grid Panels and extending the framework the right way .
Pricing
5 seats- $600 per developer/day

$400 per additional developer/day
